This important program for attorneys who handle real estate matters on the East End merges colonial history with modern practice. Learn how patents granted in the 17th Century under King James II of England continue to influence land use today and how an understanding of the role of the trustees will help you to effectively advocate for those you represent. An expert faculty will discuss, among other things:

- Evolution of the Trustees
- Jurisdiction
- Case Law
- The Role of the Town Attorneys
- DEC Issues
- Post-Sandy Erosion Issues
- Land Grants and Zoning

The evening includes dinner, wine and soft drinks, ample course materials, and the opportunity to network with other attorneys who practice on the East End of Long Island.
